

Merican Limited is a reputable organization specializing in tailors made stainless-steel fabrication and commercial food and beverage equipment solutions. Merican's goodwill has been built over the years due to attention to product detail, consistency in quality, product engineering and product improvement. These are backed by excellent and knowledgeable manpower in manufacturing, sales & after sales support in the East Africa region. Our strength lies in execution of turnkey projects across all segments of hotels, restaurants, coffee shops, Lodges, catering ventures, clubs and bars, staff canteens/cafeterias, institutional kitchens, school kitchens, hospital kitchens, factories and food processing companies and supermarkets. Having years of experience and engineering strength to back us up, we manufacture and supply the right products that motivate exquisite creation, increase space efficiency, minimize waste substantially and deliver superior results time and time again. Our products have been tried, tested and used by the best players in the industry.

SERVICES OFFERED

1. DESIGN

We use AutoCAD to custom design projects of all sizes and specialties, with expertise in kitchen efficiency and cost effectiveness.

2. SUPPLY

They fabricate the equipment in-house, meaning the customer gets high quality products at the best price.

To ensure the customer receives their products in good time we have partnered with leading shipping companies.

3. INSTALLATION

The company provides in-house technicians with expertise for a complete installation (including gas lines)

4. COMMISSIONING

There are no sub-contractors only in-house technicians and on-site team perform the services. The service manager and technical staff resolve maintenance issues. We also provide training on: how the equipment works, upkeep, servicing and long-term reliability tips.

5. MAINTENANCE/ AFTER SALES SERVICES

This program includes semi-annual maintenance to minimize disruptions and equipment downtime, maintain validity of manufacturer warranties and increase long-term equipment life expectancy. The in-house technicians are available 24 hours, 7 days a week, the gas fitters and refrigeration experts can make adjustments on-site.

6. EXTENDED MAINTENANCE

An annual contract is signed by the client for future maintenance coverage.
